

College will hire retention coach, says Abel

By Nellie Blake

In a program to improve student retention, Connestoga College will hire a coach to give students advice on their programs (see 10), and if successful, the program could be extended to other programs next year, according to President Paul Heston, president of the college.

The program will be implemented Sept. 1 to get incoming and returning students into programs. In connection, 50 students dropped out at the first year end in the retention

retention program, 40 were back in 1987-88.

Abel said the college currently does not have a coach. A college problem on a part-time basis since 1971 and left long-term 1984.

The first task of the coach, Abel said, would be to ensure the student program runs smoothly on the first day of the first semester of college students.

Abel said he is not sure if the college will hire a coach. He said he is not sure if the college will hire a coach. He said he is not sure if the college will hire a coach.

Abel said he is not sure if the college will hire a coach. He said he is not sure if the college will hire a coach. He said he is not sure if the college will hire a coach.

The second task of the coach would be to ensure students are in the right program. He said he is not sure if the college will hire a coach.

He said he is not sure if the college will hire a coach. He said he is not sure if the college will hire a coach. He said he is not sure if the college will hire a coach.

Abel said he is not sure if the college will hire a coach. He said he is not sure if the college will hire a coach. He said he is not sure if the college will hire a coach.

The coach will also ensure the student program runs smoothly on the first day of the first semester of college students.

Abel said he is not sure if the college will hire a coach. He said he is not sure if the college will hire a coach. He said he is not sure if the college will hire a coach.

The coach will be hired from either administration, counseling or from outside the college. The

coach should have qualifications in education or in the field of student retention or in the field of student retention.

The coach will be on a one-year contract with the college. Abel said he is not sure if the college will hire a coach.

In 1987, the retention rate was 64.44 per cent (1,207 students) out of 1,844 in 1986.

Protect animal life

By Kathy Bernigita

When the last animal is killed, skinned, dissected or driven dead, when the last blade of grass grows is burned or poisoned by scientific methods, when nothing more is harvested and country has a barren, radioactive wasteland where nothing but empty mountains — what then?

Do we stand back and proudly applaud as we watch the destruction of life?

I, for one, don't think we should stand back and watch university laboratories use countless monkeys to produce polar vaccines. Or for experiments that cause pain.

Do we laugh as we experiment with toxic animals' waste pipes? Experimenters could experiment with their own waste pipes. I sure don't plan to experiment with the toxic.

Animal rights activists, like the British Animal Liberation Front (ALF), have protested for years.

On Feb. 15, 1983 the ALF group broke into several research labs at the University of Toronto to destroy some of the research animals who were being tortured in pain experiments. The group was unsuccessful but took responsibility for \$70,000 worth of damage to equipment.

At this time, some scientists claim they would like to increase the number of animals and the number of experiments. They claim that the animals are worth the pain of the experiments.

Yes, I'm not a feminist or socialist. I do just enough to be a radical. I'm not a feminist or socialist. I do just enough to be a radical. I'm not a feminist or socialist. I do just enough to be a radical.

OPINION

It's not just government — it's the people who are the problem. The people who are the problem.

You tell us:

Should governments financially support historical sites?

Conestoga's long-term plans keep running short

By Diane Rabatsch

Conestoga College was planned to be a community college in the heart of downtown Ontario, at least until 1980. Then came the 1980 election and the college was planned to be a community college in the heart of downtown Ontario, at least until 1980.

A long-term plan, published Dec. 5, 1980 by the province's Ministry of Education, showed the college would cover 1,600 square miles in the counties of York, North York, and Scarborough.

Today Conestoga serves 79 municipalities with a combination of day and evening classes and programs in Conestoga College, York University, and York University. It is a combination of day and evening classes and programs in Conestoga College, York University, and York University.

It will be interesting to see the long-term plan proposed to be released in June by the province's Ministry of Education.

We have seen the last four years' plans and the last four years' plans. The last four years' plans and the last four years' plans. The last four years' plans and the last four years' plans.

Student councils learn leadership skills

By Susan Galsbolter

Nearly 4000 Conestoga college students' student council members were ready to step up to the plate May 11 when they gathered from 11 other colleges across southern Ontario for the 1984 Conference of Ontario Student Councils (COSC). During the conference, each individual got help from fellow councilors from other schools.

The speakers included representatives from the Ontario Council of Student Associations (OCSA) and the Ontario Council of Student Associations (OCSA).

OCSA's Executive Committee (OCSA) was represented by Susan Galsbolter, president, and Christine Galsbolter, vice-president. Ontario Student Association (OSA) was represented by John Peters, president, and Christine Galsbolter, vice-president. OSA's president was also present at the COSC.

Representatives were also from the Ontario Council of Student Associations (OCSA) and the Ontario Council of Student Associations (OCSA).

The 1100 plus for each person in attendance also may have been a factor in the decision to hold the conference at the OCSA.

Representatives were also from the Ontario Council of Student Associations (OCSA) and the Ontario Council of Student Associations (OCSA).

representatives and develop their own ideas.

"We have to improve our management by most of them and of many problems in the school," said Galsbolter. "We have to be able to solve problems in the school."

Galsbolter added that Galsbolter was responsible for helping to create their own student council at Conestoga College, although he could not spend a lot of time on problems with or how Galsbolter has been responsible.

"This year I would like to see a lot of students in the school who are not in the school," said Galsbolter.

Galsbolter said there was a lot of students in 1983 and that there was a lot of students in 1983 and that there was a lot of students in 1983.

Area Historic Sites

19th century churches testimony to heritage

By William Weller

Georgian architecture has a long history in the area, and the 19th century churches are a testament to this heritage.

Early Georgian residents constructed 13 churches between 1810 and 1830, of which 11 still stand and five have been designated as historic.

North Huron, where pioneer churches of Georgian and Regency styles are preserved, is the site of the first church in the area, the St. George's Anglican Church in Windsor. Built in 1810, it is the oldest church in the area.

Church of Our Lady, which features Georgian architecture, is the oldest church in the area. It was built in 1810 and is the oldest church in the area. It is the oldest church in the area.

Emperor Maximilian of Austria

found a grant for the first Anglican church in the area, and the first church in the area.

A parish in London led to the construction of a church in the area. The church was built in 1810 and is the oldest church in the area. It is the oldest church in the area.

The John McCracken House is surrounded by a white fence. The house was built in 1820 and is the oldest house in the area.

Historic Sites (continued)**Artist's home a national gallery****By Melia Blake**

Located on Old Mill Road, Kitchener, The Homer Watson House and Gallery is one of many historical sites displaying our roots, but also the things they did in their lifetime.

Homer Watson, who died in 1916, was one of Canada's first landscape artists. He painted about 1,000 watercolours, and his house village was his inspiration.

When Watson's wife and son died, the house and gallery was one of many historical sites displaying our roots, but also the things they did in their lifetime.

The early Victorian-style house and gallery was built in 1839 by John Peter Watson, son of the first owner, the first owner, the first owner.

Although Watson's house was built in 1839, it was not until 1916 that the house was built in 1839.

Since then there have been many changes made to the house.

Watson's house was built in 1839, and it was not until 1916 that the house was built in 1839.

The house was built in 1839, and it was not until 1916 that the house was built in 1839.
